

Seminario “Major environmental changes since Last Interglacial (MIS5) in South-western Atlantic (SWA): evidence from the fossil record in Patagonia.”

In this talk I will summarize the general aspects of the sedimentology, malacology and ichnology in marine quaternary deposits in central Patagonia, exploring the biotic responses to paleoenvironmental changes since the Late Pleistocene.

Mercoledì 29 aprile, ore 11, Aula Lucchesi, dipartimento di Scienze della Terra

My name is Sebastian Richiano, I am from Argentina and have a degree in Geology (2006) of the Faculty of Natural Sciences of the National University of La Plata, (Argentina), a PhD in Natural Sciences (2012) at the same university. I am a researcher of CONICET, working on sedimentology and ichnology of marine sequences of different geological ages. I am Professor at the National University of La Patagonia (Argentina). Between 2018 and 2023 I was the editor-in-chief of Latin American Journal of Sedimentology and Basin Analysis. Since 2024 I am Vice-president of the International Union of Quaternary Research (INQUA).
